BOOK SYNOPSIS

This text is a treatment planner and theory guide for therapists working from systemic and postmodern approaches. Unlike existing resources, this treatment planner provides a means to directly integrate family therapy theory and practice. By providing treatment planning strategies along with complete overviews of specific theories, the book provides a remedy for the common "missing link" between theory and practice. The purpose of this book is to fill the ever-widening gap between formal training in theory and actual practice in managed-care dominated workplaces. The text covers 11 of the most widely used family therapies providing a summary for each theory and then specific strategies for developing a treatment plan.
